SUMMARY

Senior AI Engineer with 13+ years of expertise in full stack AI solution design, development and deployment across healthcare and enterprise domains. Experienced in building production grade agentic systems, LLM evaluation frameworks, and RAG-based applications using LLMs. Proven track record in leading cross functional teams to deliver AI native outcomes that drive measurable business impact. Expert in prompt engineering and optimization, and scalable ML pipelines with deep knowledge of cloud platforms (AWS, Azure, GCP) and modern AI development tools. Skilled in translating complex business requirements into innovative technical solutions while maintaining rigorous software engineering standards, compliance guardrails, and cost optimization strategies.

KEY SKILLS

- Data Collection
- LLM Evaluation
- Agentic AI Systems & Orchestration
- Model Development
- Retrieval Augmented Gen (RAG)
- Data Engineering & Pipelines
- Model Enhancement
- Prompt Engineering
- System Design & Cloud

TECHNICAL SKILLS

Programming Languages: Python, SQL, C#, R

Machine Learning Algorithms: Regression, Classification, Decision Trees, Random Forests, SVM, Neural Networks, NLP

LLM & GenAI Frameworks: LangGraph, LangChain, GPT-4, Claude API, Azure OpenAI, Prompt Optimization

Data Engineering Tools: Apache Beam, Dataflow, BigQuery, Apache Spark, Matplotlib, Seaborn, Tableau

AI Development Tools: VS Code, Jupyter Notebooks, Git, Azure DevOps, MLflow, Docker, CI/CD Pipelines, Cursor, Claude Code

ML Frameworks & Libraries: TensorFlow, Keras, PyTorch, Scikit-Learn, SciPy, Hugging Face Transformers

Cloud Platforms: Microsoft Azure, Amazon web services, Google cloud platform

EXPERIENCE

TECHNICAL SPECIALIST - II: CITIUSTECH HEALTHCARE, MISSISSAUGA, CANADA

MAY 2024 - PRESENT

CitiusTech is a leading consulting and digital technology provider to 130+ healthcare and life sciences companies.

- Acted as the key liaison with BA and Product Owners, translating business needs into actionable technical requirements
- Led development of agentic systems using LangGraph
- Go-to-market persona-based RAG chatbot agents, enabling persona-specific responses
- Web scraper agent for automated healthcare product comparison via web scraping, achieving **15% accuracy** improvement
- Taskmaster agent for Azure DevOps story generation from epics, **reducing BA/QA effort by 30%** over the project timeline
- Designed and reviewed scalable AI/ML pipelines with React-based frontends and backend APIs, integrating LLMs into full-stack applications with focus on reliability and performance
- Drove adherence to software engineering best practices by leading code refactoring, coding standards, conducting peer reviews

TECHNICAL SPECIALIST: CITIUSTECH HEALTHCARE, MUMBAI, INDIA

APR 2023 – APR 2024

- Designed healthcare **LLM evaluation framework** with guardrails, leveraging LLM as judge models to assess factual accuracy, hallucinations, context adherence, response relevancy and HIPAA compliance across large language models
- Led implementation of Prefix Tuning for **prompt optimization** to improve evaluation consistency and reduce inference costs, while creating specialized prompts for healthcare specific criteria
- Interacted with Business analysts and Product Owners for regular updates and on behalf of the team
- Managed team of dynamic data scientists and conducted regular discussions for progress, challenges and action plans
- Delegated tasks and responsibilities, ensuring optimal team productivity and efficiency
- Helped maintain code standards by taking part in code restructuring and review based on requirements

TECHNICAL LEAD: CITIUSTECH HEALTHCARE, MUMBAI, INDIA

SEP 2021 – MAR 2023

- Extracted Data from different client databases including SQL, API, and virtualization tools
- Curating **custom data pipelines** using GCP dataflow which reduced manual effort and **optimized solutions by 15%**
- Visualized Data using Python libraries, BigQuery and Google data studio
- Designed web scrapping tools to **generate 50% of data** used for training the model
- Built Physician classification models by **employing Stanza with 98% accuracy** based on queries by the users
- Played a key role in designing ML algorithm for identifying medical experts from **10M+ data points**
- Appreciated by **client and team** throughout the project timeline for achieving targets

APPLICATION DEVELOPMENT SENIOR ANALYST: ACCENTURE, MUMBAI, INDIA**MAY 2019 - SEP 2021***Accenture specializes in information technology services and consulting. A Fortune Global 500 company.*

- Performed ML model deployment by utilizing Azure cloud services.
- Design and development of an architecture for MS Project and Dynamic 365 integration by leveraging Azure & AWS services.
- Cloud cost optimization, migration, and value realization which reduced business cost by 9%.
- Build complex **function apps, lambda functions, and APIs** to cater to application integration needs.
- Created an extensive CI/CD pipeline for code deployment by engaging Git and Azure DevOps.
- Received Prestigious **Accenture Ace Award** for surpassing targets by 15%.

CONSULTANT: CAPEGEMINI, MUMBAI, INDIA**JAN 2017 - MAY 2019***Capgemini is a consulting, technology services, and digital transformation company and has a presence in over 50 countries.*

- Development of a one click cloud migration app that **saves the organization 1M+ of migration costs**.
- Cloud deployment optics for high scale agricultural application based on deep learning.
- Received reputed **Out of Box award** for building an innovative solution.
- Collaborated with a team of 7 developers to create the backend for 3 apps.

JUNIOR SOFTWARE DEVELOPER: PCS TECHNOLOGIES, MUMBAI, INDIA**JUL 2014 - DEC 2016***PCS is a leading IT solutions company, delivering customized solutions and services for businesses.*

- Completed development and maintenance of LIMS application for more than **200 Client labs**.
- Participated in the Scrum meeting & Unit tested software components.
- Curated and maintained technical documentation.

SOFTWARE DEVELOPMENT EXECUTIVE: KANAL SOLUTIONS LIMITED, MUMBAI, INDIA**JAN 2013 - JUL 2014***KSL is a leading solution provider for offering various Products for technology driven customers.*

- Understood and analyzed the requirements with stakeholders.
- Designed and coded multiple Web, windows, and service-based **applications and 5 sub-systems**.

EDUCATION**Master of Science in Artificial Intelligence & Machine Learning**
Liverpool John Moores University**APR 2022 – MAY 2023****Post Graduate Diploma in Machine Learning & AI**
International Institute of Information Technology**MAR 2021 - APR 2022****Bachelor of Engineering in Information Technology**
University of Pune**JUN 2007 - MAY 2012**

CERTIFICATIONS

- Google Cloud Certified Professional Cloud Architect
- Microsoft Certified Azure Developer Associate

RECOGNITION

Capgemini-Sogeti Out of the box award - 2019

Accenture ACE award - 2020

CitiusTech Certificate of appreciation – 2022 & 2024

OTHER SKILLS**Languages:** English, Hindi, Arabic
